

Agustin Xocua Dimayuga

axocuadi@calpoly.edu — 714-376-9559 — linkedin.com/in/agustinxocuadimayuga

Education

California Polytechnic State University, San Luis Obispo

Expected June 2028

Bachelor of Science in Computer Science

GPA: 3.78

Relevant Coursework: Data Structures & Algorithms, Discrete Mathematics, Object-Oriented Programming, Systems Programming, Web Development & Databases

Technical Skills

Languages: C, Python, JavaScript, RISC-V Assembly

Frontend: React, Angular, HTML, CSS, Tailwind

Backend: Node.js, Supabase, MongoDB, REST APIs

Tools: Git, Electron

Work Experience

Shift Lead / Fry Cook — Raising Cane's Chicken Fingers

June 2023 – Present

- Managed kitchen operations to ensure food quality, safety, and presentation
- Delivered strong customer service by understanding and addressing customer needs
- Collaborated with team members to improve efficiency and workflow

Relevant Experience

Software Engineering Member — Cal Poly Racing

Sept 2025 – Present

- Developed a full-stack Material Requirements Planning (MRP) platform using Angular (TypeScript) and Supabase to support team-wide operations
- Implemented secure authentication and authorization using Supabase Auth
- Designed and built a real-time telemetry pipeline for streaming vehicle data from car systems to pit-side tools
- Created an Angular + Electron desktop data visualization tool using a custom binary protocol, reducing calibration and analysis time by 50%
- Collaborated with cross-functional teams, contributing to a 2nd-place overall finish in dynamic events

Research Project — Scratch Alternative Interface Design

Sept 2025 – Dec 2025

- Designed and prototyped a front-end interface aimed at reducing abstraction in block-based programming tools for K-12 students
- Created UI/UX prototypes in Figma to explore more transparent representations of programming concepts beyond Scratch
- Iterated on designs to improve usability and accessibility for beginner programmers
- Contributed to research on transitioning students from visual to text-based programming

Projects

PolyMarket

React, TypeScript, Tailwind CSS, Node.js, MongoDB, VPS

- Engineered a full-stack housing platform for students using React (TypeScript), Tailwind CSS, Node.js, and MongoDB
- Designed and implemented scalable REST APIs with full CRUD functionality and advanced search/filtering
- Built secure authentication and session management using JWT-based auth flows
- Deployed and managed the application on a VPS, handling production configuration, routing, and server setup
- Structured and optimized MongoDB schemas to efficiently manage user and listing data
